An Important Message from the Headmaster

Dear Archway Scottsdale Parents,

As you may know, 5 Guys Roofing has been supporting Archway Scottsdale through the timely completion of a necessary roofing project - a proactive and preventative measure for the protection of our campus and our students. Today, some of our faculty and staff began to smell an odor in various parts of the building that was a result of this project. Our Director of Operations connected with 5 Guys Roofing, who stopped the project and implemented our request to finish sealing the roof this weekend when no students or staff will be on campus. Since then, I connected with members of our Leadership Team, which includes various members of Administration as well as grade level, ESS, and specials Lead Teachers disbursed throughout the building to assess the situation. I am pleased to report that teachers and staff were proactive and relocated themselves and their students away from impacted rooms to maintain the integrity of the learning environment and continue with their day without distraction or exposure to the smell.

I am grateful for your partnership in your students' education and formation,

Dr. Anthony Sciubba
